EXPERIENCE

Publicis Sapient | Associate in Technology | Gurgaon | October 2021 – Present

KPMG: [*React.js, SCSS, HTML, Accessibility (WCAG), Analytics*]

- Developed modular style sheets utilising SASS for a multilingual website, resulting in a 40% decrease in CSS file size for the site and increasing maintainability and flexibility. Customised existing style dictionary to be used by the entire team for development purposes.
- Led custom components for the platform. Used React and Vanilla JavaScript at the component level based on requirements.
- Enhanced accessibility compliance by adhering to WCAG standards, improving usability.
- Implemented analytics to track form abandonment, identifying key friction points and optimizing user flows, resulting in a 15% increase in customer conversions.

Tata Consultancy Services | System Engineer | Gurgaon | July 2019 – October 2021

Citi NAM – VAN 2.0 – [*React.js, HTML, CSS, Jest and Java*]

- Implemented a responsive user interface for a web application using React. Integrated the API calls. Contributed to design planning and user experience to boost overall customer satisfaction ratings.
- Automated testing with Selenium (Java) for both iOS and web platforms; streamlined the quality assurance process, reducing testing time and enhancing test coverage by 20%

CNOPS – [*React.js, Charts.js, HTML, CSS (Bootstrap & CSS3)*]

- A web app that shows the network logs of the sites with existing and potential alarms in the form of a table or data visualisation according to the user's preference.
- Developed the demo project for the network operator dashboard for MWC 2020
- Crafted data visualization libraries with React to transform complex network logs into interactive dashboards. Optimised the existing app by creating reusable components and reduced API calls.

PROJECT

SENSEI MODS – [*React, JWT, CSS, HTML*]

- Sensei Mods is an e-commerce website which allows users to customize the computer cables.
- Worked as a react developer and developed the whole website from scratch

IMDB Clone – [*React, Redux, REST API Integration, State Management*]

- Developed an IMDB clone using React.js and Redux, providing a seamless user interface for movie exploration.
- Integrated external APIs to fetch and display movie details, trailers, and user reviews in real-time
- Utilized state management with Redux to handle user interactions and dynamic content efficiently. Implemented functionality for personalized user experiences.

EDUCATION

Bachelor in Technology (Computer Science Engineering), Guru Gobind Singh Indraprastha University– [8.07 CGPA]

[August 2015 - May 2019] New Delhi

CBSE Class XII, Gagan Bharti Sr Sec Public School – [82.6%]

[April 2014 - May 2015] New Delhi

CBSE Class X, Gagan Bharti Sr Sec Public School – [8.4 CGPA]

[April 2011 - May 2012]

SKILLS

- **Languages** – Javascript, TypeScript, HTML, CSS, Java, CSS3, SCSS, Less/Sass
- **Frameworks/Libraries:** React, Angular, Bootstrap, jQuery, Redux, Context API, Jest, React Routers, GraphQL, Webpack
- **Other Skills:** RESTful API Integration, GraphQL, npm, Git, Jenkins, Agile Methodologies, Accessibility Standards, Responsive Web Development, Web Analytics, Webpack, Data Structures and Algorithms.

RECOGNITION

- **TCS** – On the spot award X2
- **Publicis Sapient** –Awarded 'Learning Mindset' twice at Publicis Sapient for acquiring new technical skills to address project challenges
- **'New Feature Integration'** recognition for seamlessly integrating features into existing systems.
